#### Custom Signs

To ensure the highest quality print job, custom designs require the submission of vectorized AI or EPS files. If vector art is not available, you may send a layered PhotoShop Document (PSD) or a high resolution PDF, JPG, PNG or TIF. Standard print jobs require at least 300dpi resolution. We will evaluate your art and advise you if it is suitable for print. In instances where a complete re-creation of art is necessary, a design fee may be applicable. Remember to advise us if a specific font is required and also provide us with the PMS or CMYK color value when a specific color is required.

Please contact us for additional information.

Notes: Photos are not recommended on corrugated posters. Custom posters may require an extra day.
